

List of rare subtypes of autoimmune bullous disease for which a commercial assay capable of detecting specific autoantibodies is not available.

	AIBD subtypes	Autoantibody class	Autoantigen
Pemphigoid group	Anti-laminin 332 mucous membrane pemphigoid (MMP)	IgG	Laminin 332
	MMP	IgG	BP180 C-terminus
	Linear IgA disease (LAD)	IgA	Shedded portion of BP180 (LAD1)
	Non-inflammatory bullous pemphigoid (BP)	IgG	BP180 ectodomain
	Gliptin associated BP	IgG	BP180 ectodomain
	p200 Pemphigoid	IgG	Laminin γ 1
	Oral MMP	IgG	α 6 integrin subunit
	MMP, mainly ocular	IgG	β 4 integrin subunit
	NC16A and BP230 negative BP	IgG	BP180 epitopes
	BP	IgE	BP180, BP230
Pemphigus group	Paraneoplastic pemphigus	IgG	Plakins
	Paraneoplastic pemphigus	IgG	Alpha-2-macroglobulin-like-1
	Paraneoplastic pemphigus	IgG	Desmocollin 3
	Atypical pemphigus (herpetiformis; vegetants etc)	IgG	Desmocollin 1, 2, 3
	IgA pemphigus	IgA	Desmocollin 1
